

DATA SHEET - SERVICE MANUAL

APPLICATION

Directional spool valves type WE5... electrically operated are intended for change in direction of fluid flow in a hydraulic system and thus it allows to change direction of movement of a receiver - mostly piston rod of a cylinder or hydraulic motor as well to use functions: *on* and *off*. These directional spool valves are used for subplate mounting in any position in a hydraulic system.

Directional spool valve is complied with the regulations of directive **2006/95/WE** for the following voltages:

- 50 – 250 V for AC
- 75 – 250 V for DC

DESCRIPTION OF OPERATION

4 WE5 J - 6X/G24NZ4

Main elements of directional spool valve type WE6... are: housing (1), solenoids (3), control spool (2), centering springs (4) and manual overrides (5).

The spool (2) is shifted when it is moved into one of end positions by the force of solenoid (3) affecting it. The return of the spool into neutral position and centering are secured by the centering springs (4). The shape of the spool (control edge spacing) affects the configuration of connections among the ports: **A**, **B**, **P** and **T**.

In case of emergency, the spool can be shifted manually by means of the override (5) – only for version with manual override.

When the situation is anticipated, directional spool valve must be mounted in the way as to be available. WE5.../O...- 2-position directional spool valve without return springs. The spool is positioned and supported with attached solenoid. There is no neutral position as the spool is not positioned.

WE5...OF...- 2-position directional spool valve without return springs with detent. The spool (2) is positioned and supported with detent (6), and its shift results from supplying voltage to one solenoid (3).

TECHNICAL DATA

Hydraulic fluid	mineral oil				
Required filtration	up to 16 μm				
Recommended filtration	up to 10 μm				
Nominal fluid viscosity	37 mm ² /s at temperature 55 °C				
Viscosity range	2,8 up to 380 mm ² /s				
Fluid temperature range (in a tank)	recommended	40 °C up to 55 °C			
	max	-20 °C up to +70 °C			
Ambient temperature range	- 20 °C up to +50 °C				
Maximum operating pressure	ports P, A, B	25 MPa			
	port T	6 MPa

	flow section	6 % nominal flow		3 % nominal flow	
Supply voltage for solenoids	DC			AC	
	12V	24V	110V	230V - 50Hz	110V - 50Hz
Power requirement	26 W			-	
Holding current	-			46 VA	
In-rush current	-			130 VA	
Duty cycle	continues			continues	
Switching time, on	40 ms			25 ms	
Switching time, off	30 ms			20 ms	
Maximum switching frequency	15000 on/h			7200 on/h	
Insulation	IP 65				
Solenoid coil temperature	max 150 °C				
Weight	1,4 kg				

ASSEMBLY AND APPLICATION REQUIREMENTS

1. Only valve working properly and suitably installed may be connected to an electric system. Only skilled workers are allowed to connect and disconnect electric system.
2. Ground connection ($\frac{1}{\text{PE}}$) must be connected with protective earth wire (PE $\frac{1}{\text{PE}}$) in supply system according to appropriate instructions.
3. It is forbidden to apply directional spool valve if the supply cable in the gland of plug-in-connector is not properly tightened.
4. It is forbidden to apply directional spool valve if the plug-in-connector is not properly tightened to the solenoid socket and is not secured by screwing bolt tightly.
5. Due to heating solenoid coils, directional spool valves should be placed in order to eliminate the possibility of incidental touch while using, or, they should be equipped with the coil covers (in accordance with the European standards PN - EN ISO 13732-1 and PN - EN 982).

DATA SHEET - OPERATION MANUAL

APPLICATION

Directional spool valves type WE6... electrically operated are intended for change in direction of fluid flow in a hydraulic system and thus it allows to change direction of movement of a receiver - mostly piston rod of a cylinder or hydraulic motor as well to use functions: *on* and *off*. These directional spool valves are used for subplate mounting in any position in a hydraulic system.

Directional spool valve is complied with the regulations of directive 2006/95/WE for the following voltages:

- 50 – 250 V for AC
- 75 – 250 V for DC

DESCRIPTION OF OPERATION

Main elements of directional spool valve type WE6... are: housing (1), solenoids (3), control spool (2), centering springs (4) and manual overrides (5). The spool (2) is shifted when it is moved into one of end positions by the force of solenoid (3) affecting it. The return of the spool into neutral position and centering are secured by the centering springs (4). The shape of the spool (control edge spacing) affects the configuration of connections among the ports: A, B, P and T. Function of ports:

P - supply port
T - oil return to the tank

A, B - ports for a receiver

In case of emergency, the spool can be shifted manually by means of the override (5) - only for version with manual override.

When the situation is anticipated, directional spool valve must be mounted in the way as to be available.

Version WE6.../OF... - only for spools: A, C, D. 2-position directional spool valve without return springs with detent. The spool (2) is positioned and supported with detent (6), and its shift results from supplying voltage to one solenoid (3).

DESCRIPTION OF OPERATION

Version WE6.../O...- only for spools: **A, C, D**. 2-position directional spool valve without return springs. The spool is positioned and supported with attached solenoid. There is no neutral position as the spool is not positioned.

Version WE6.../...**B**... - directional spool valve designation like that, has throttle insert in port **P**.

TECHNICAL DATA

	12V	24V	110V	230V-50Hz	220V- 50Hz	110V- 50Hz	230V- 50Hz
Supply voltage tolerance	±10%						±10%
Power requirement (DC)	30 W						–
Holding power (AC)	–						50 VA
Switch-on power (AC)	–						300 VA
Switching time	ON up to 60 ms						ON up to 40 ms
	OFF up to 40 ms						OFF up to 25 ms
Maximum switching frequency	15000 on/h						12000 on/h
Degree of protection	IP 65						
Solenoid coil temperature	max 150 °C						

INSTALLATION AND OPERATION REQUIREMENTS

1. Only fully functional and operational valve, properly connected to electrical installation must be used. Connecting or disconnecting the valve to an electrical installation must only be carried out by qualified personnel.
2. Ground connection ($\text{PE} \frac{\perp}{\text{---}}$) must be connected with protective earth wire (PE $\frac{\perp}{\text{---}}$) in supply system according to appropriate instructions.
3. Solenoid plug shall precisely adhere to socket and shall be secured with thread bolt screwed in securely in a place. It is forbidden to operate the valve if the tightness and suitable clamp of cable in the plug gland are not ensured.
4. For the ...W230 - 50... valves, simultaneous joining of two solenoids of the same valve should not be permitted (partial overriding of the valve can overheat and damage the winding coils).
5. During the period of operation must be kept fluid viscosity acc. to requirements defined in this Data Sheet - Operation Manual
6. In order to ensure failure free and safe operation the following must be checked:
 - condition of the electrical connection
 - proper working of the valve
 - cleanliness of the hydraulic fluid
7. Due to heating of electromagnet solenoid coils to high temp., the valve shall be placed in such way to eliminate the risk of accidental contact with solenoid during operation or to apply suitable covers acc. to PN-EN ISO 13732-1 and PN-EN 982
8. In order to ensure tightness of the directional valve block, one should take care of dimension of sealing rings and valve operation parameters given in this Data Sheet - Operation Manual
9. A person that operates the valve must be thoroughly familiar with this Data Sheet - Operation Manual.

(only for 2-position versions with return spring)

Diagrams for directional control valves and initial positions of switches

initial position of inductive switch type M depending on the spool position 0 - off neutral state on output contact 1 - on state on output contact		diagram for directional control valve
2-position versions WE6A...; ...C...; ...D...; ...D1... switch on side b		
position monitored a 	position monitored b 	
2-position versions WE6B...; ...Y...; ...Y1... switch on side a		
position monitored a 	position monitored b 	

ACCESSORIES

Spool position switch type M

Overall dimensions

version with solenoid on side **a** and switch type **M**

version with solenoid on side **b** and switch type **M**

Requirements of surface state of the subplate - according to page 6

NOTES:

Directional control valve with spool position switch is adjusted. Any adjustments may be made only by the manufacturer.

In case of a faulty switch or valve complete directional control valve must be changed.

- 1 - O-ring 9,2 x 1,8 - 4 pcs/set (P,T, A, B)
- 2 - Dimension of directional control valve **2-position, with return spring** with **1 solenoid** - on side **a** and switch type **M** (spool diagrams: **A, C, D, D1, EA, FA, GA, HA, JA, LA, MA, PA, UA, WA** - on page 4, 5)
- 3 - Dimension of directional control valve **2-position, with return spring** with **1 solenoid** - on side **b** and switch type **M** (spool diagrams: **B, Y, Y1, EB, FB, GB, HB, JB, LB, MB, PB, UB, WB** - on page 4, 5)
- 4 - Distance for mounting plug-in-connector and cable of switch (plug-in-connectors not showed in the drawing must be ordered separately according to data sheet **WK 499 963**)

HOW TO ORDER

	WE	6	+	/						+
--	-----------	----------	----------	----------	--	--	--	--	--	----------

Number of service ports

3-way - only for spools A, B = **3**

4-way - for the other spools = **4**

Nominal size (NS)

NS6 = **6**

Spool symbol

spool diagrams - according to **page 4, 5**

Series number

(30-39) - connection and installation dimensions unchanged = 3X
series 32 = **32**

Spool positioning

spring centering = **no designation**

without springs return (only fo spools A, C, D) = 0

without springs return with detent(only fo spools A, C, D) = OF

Control voltage for solenoids

12V DC = G12

24V DC = **G24**

110V DC = G110

110V AC 50Hz (plug-in-connector with rectifier) = W110R

220V AC 50Hz (plug-in-connector with rectifier) = W220R

230V AC 50Hz (plug-in-connector with rectifier) = **W230R**

230V AC 50 Hz (direct supply with AC current) = W230-50

Manual override

solenoids with manual override = **N**

solenoids without manual override (only for version with inductive switch type M) = no designation

Manual lever control

no manual control lever = **no designation**

with a manual control lever psitioned vertically = H

with a manual control lever psitioned at an angle = HS

Electrical connection

plug-in-connector type ISO 4400 (DIN 43650 - A) **without LED** = **Z4**

plug-in-connector type ISO 4400 with LED = Z4L

withoput plug-in-connector, with 2-poles male **AMP Junior Timer** type connector (exists for ...G12... and ...G24... options only) = J

withoput plug-in-connector, with **DEUTSCH** type connector (exists for ...G24... option only) = D

Throttle insert (in port P)

without throttle insert = **no designation**

throttle insert ϕ 0,8 = B 08

throttle insert ϕ 1,0 = B 10

throttle insert ϕ 1,2 = B 12

HOW TO ORDER

	+		★
--	---	--	---

Further requirements in clear text
(to be agreed with the manufacturer)

Monitored position of the spool

monitored position **0** - **zero** (*3- position and 2- position versions with positions (a, 0) or (0, b)*) = 0

monitored position **a** (*2- position versions with positions (a, 0) or (a, b)*) = A

monitored position **b** (*2- position versions with positions (0, b) or (a, b)*) = B

monitored position **a** and **b** (*3- position versions*) = AB

Spool position switch

spool position switch type **S1** = S1

spool position switch type **S2** = S2

spool position switch type **M** (only for 2-positions versions with return spring) = M

NOTES:

Optional version with a spool position switch and a manual control lever (options ...H...; ...HS...) available after consultation with the manufacturer.

Sealing

NBR (for fluids on mineral oil base) = **no designation**

FKM (for fluids on phosphate ester base) = V

NOTES:

Directional spool valve should be ordered according to the above coding.

The symbols in bold are preferred versions in short delivery time.

Coding example: 4WE6 E - 32/G24 N Z4 B08 S1 - AB

EXAMPLE OF APPLICATION IN HYDRAULIC SYSTEM

SUBPLATES AND FIXING SCREWS

Subplates must be ordered according to catalogue sheet **WK 496 480**. Subplate symbols:

G 341/01 - threaded connections G 1/4

G 342/01 - threaded connections **G 3/8**

G 502/01 - threaded connections G 1/2

G 341/02 - threaded connections M14 x 1,5

G 342/02 - threaded connections M16 x 1,5

Subplates and screws fixing directional valve **M5 x 50 - 10,9** in accordance with **PN - EN ISO 4762** - 4 pcs/set) must be ordered separately.

Tightening torque **Md = 9 Nm**

The subplate symbol in bold is the preferred version available in short delivery time.
