

# DIRECTIONAL CONTROL INLINE POPPET VALVES 27 SERIES

# PRODUCT CATALOG

# **Inline Poppet Valves 27 Series Product Overview**

#### **Directional Control Function**

Directional control valves function is to control the direction of flow in the pneumatic circuit. Directional control valves are able to control the way the air passes. These valves can regulate the airflow being capable to stop fluid flow, allow fluid flow, and change the direction of fluid flow. These three functions usually operate in combination.

Illustration examples.

VALVE FEATURES								
Poppet Design	Poppet construction for high dirt tolerance							
Mounting Options	Can be mounted close to actuator, reducing length of pipe to be pressurized/exhausted on each cycle							
Pilot Supply	Internal or external							
High Velocity	Near zero leakage							
Positive Sealing	No sliding action to prevent damage and wear							
Reliability	Consistent response times over the life of the valve							

Explosion-Proof solenoid pilot valves available, see valves for Hazardous Locations.

<sup>\*</sup> Valve Response Time — Response Time (msec) = M + (F • V). This is the average time required to fill a volume V (cubic inches) to 90% of supply pressure or to exhaust it to 10% of supply pressure. M and F values are shown above.

Size				Flow		Average Response Constants *		
Dodu	Double 0. 4	Dort 2	C <sub>V</sub> (N	C <sub>V</sub> (NI/min)		F		- <b>≈ Weight</b> Ib (kg)
Body	Port 1, 2, 4	Port 3	1-2, 1-4	4-3, 2-3	M	1-2, 1-4	4-3, 2-3	
	1/4	1/2	2.1 (2100)	2.9 (2900)	10	0.92	0.92	
3/8	3/8	1/2	2.9 (2900)	4.2 (4100)	10	0.90	0.90	1.8 (0.8)
	1/2	1/2	3.1 (3100)	4.3 (4200)	10	0.89	0.73	1
	1/2	1	5.6 (5500)	8.1 (8000)	26	0.50	0.66	4.3 (1.9)
3/4	3/4	1	7.0 (6900)	9.3 (9200)	26	0.36	0.55	
	1	1	7.8 (7700)	10 (9800)	26	0.35	0.50	
	1	1-1/2	19 (19000)	26 (26000)	79	0.22	0.22	
1-1/4	1-1/4	1-1/2	21 (21000)	27 (27000)	79	0.18	0.18	10.3 (4.6)
	1-1/2	1-1/2	22 (22000)	27 (27000)	79	0.15	0.15	

<sup>\*</sup> Valve Response Time — Response Time (msec) = M + (F • V). This is the average time required to fill a volume V (cubic inches) to 90% of supply pressure or to exhaust it to 10% of supply pressure. M and F values are shown above.

# **Accessories**

## **EXHAUST SILENCERS**

Illustration example.

	SPECIFICATIONS		Silencer Material		Pressure Range psig (bar)		Schematic	
			Aluminum		0-290 (0-20) r	maximum		
Silencers	Port Size Thread Type	Flow Model I		Number	<b>Dimensions</b> inches (mm)		≈ Weight	
	1 011 0120		C <sub>v</sub> (NI/min)	NPT Thread	R/Rp Thread	Length	Hex Size (D)	lb (kg)
	1/2	Male	6.8 (6700)	5500A4003	D5500A4003	3.6 (9)	1.25 (32)	0.2 (0.1)
	1	Male	18 (18000)	5500A6003	D5500A6003	5.4 (14)	2.0 (51)	0.9 (0.4)
	1-1/2	Female	39 (38000)	5500A8001	D5500A8001	5.7 (14)	2.5 (64)	1.3 (0.6)
	2-1/2	Female	104 (100000)	5500A9002	D5500A9002	4.0 (102)	5.7 (145)	2.9 (1.4)

## **FEMALE SILENCER CONNECTORS**

	Material	Fitting Pipe Size	Thread Type	Model Number		
Hex Nipples	Matorial			NPT Thread	BSPT Thread	
TICK HIPPICS	Ctool	1-1/2	Male - Male	488J27	122J39	
	Steel	2-1/2	Male - Male	490J27	123J39	

#### **SOLENOID PILOT INDICATOR LIGHT KITS**

Illustration example.

# Indicator Light Kits

	Kit Number	
24 V DC	110-120 V AC, 50-60 Hz	230 V AC, 50-60 Hz
862K87-W	862K87-Z	862K87-Y

To visually verify valve operation, indicator light kits are available for single solenoid models. Indicator lights are standard on double solenoid valves. The indicator light is illuminated when the solenoid is energized.

#### **SOLENOID PILOT MANUAL OVERRIDE KITS**

Flush Button	Extended Button	Extended Button with Palm

Illustration examples.

# Manual Override Kits

Manual Override Type	Kit Number			
Manual Overriue Type	Locking Type	Non-Locking Type		
Flush Button	792K87	790K87		
Extended Button	-	791K87		
Extended Button with Palm	-	984H87		

Flush rubber button, non-locking manual override is standard on solenoid models.

Each of the buttons in the override kits is made of metal and is spring-returned. The locking type button, however, can be kept in the actuated position by turning the slot in the top of the button with a screwdriver.

# Notes

#### **CAUTIONS, WARNINGS And STANDARD WARRANTY**

ROSS OPERATING VALVE, ROSS CONTROLS®, ROSS DECCO®, and AUTOMATIC VALVE INDUSTRIAL, collectively the "ROSS Group".

#### PRE-INSTALLATION or SERVICE

- 1. Before servicing a valve or other pneumatic component, be sure all sources of energy are turned off, the entire pneumatic system is shut down and exhausted, and all power sources are locked out (ref: OSHA 1910.147, EN 1037).
- 2. All ROSS Group Products, including service kits and parts, should be installed and/or serviced only by persons having training and experience with pneumatic equipment. Because any product can be tampered with and/or need servicing after installation, persons responsible for the safety of others or the care of equipment must check ROSS Group Products on a regular basis and perform all necessary maintenance to ensure safe operating conditions.
- 3. All applicable instructions should be read and complied with before using any fluid power system to prevent harm to persons or equipment. In addition, overhauled or serviced valves must be functionally tested prior to installation and use. If you have any questions, call your nearest ROSS Group location.
- 4. Each ROSS Group Product should be used within its specification limits. In addition, use only ROSS Group components to repair ROSS Group Products.

#### **WARNINGS:**

Failure to follow these instructions can result in personal injury and/or property damage.

#### FILTRATION and LUBRICATION

- 1. Dirt, scale, moisture, etc., are present in virtually every air system. Although some valves are more tolerant of these contaminants than others, best performance will be realized if a filter is installed to clean the air supply, thus preventing contaminants from interfering with the proper performance of the equipment. The ROSS Group recommends a filter with a 5-micron rating for normal applications.
- 2. All standard ROSS Group filters and lubricators with polycarbonate plastic bowls are designed for compressed air applications only. Use the metal bowl guard, where provided, to minimize danger from high pressure fragmentation in the event of bowl failure. Do not expose these products to certain fluids, such as alcohol or liquefied petroleum gas, as they can cause bowls to rupture, creating a combustible condition and hazardous leakage. Immediately replace crazed, cracked, or deteriorated bowls.
- 3. Only use lubricants which are compatible with materials used in the valves and other components in the system. Normally, compatible lubricants are petroleum base oils with oxidation inhibitors, an aniline point between 180°F (82°C) and 220°F (104°C), and an ISO 32, or lighter, viscosity. Avoid oils with

phosphate type additives which can harm polyurethane components, potentially leading to valve failure which risks personal injury, and/or damage to property.

#### **WARNINGS:**

Failure to follow these instructions can result in personal injury and/or property damage.

#### **AVOID INTAKE/EXHAUST RESTRICTION**

- 1. Do not restrict air flow in the supply line. To do so could reduce the pressure of the supply air below minimum requirements for the valve and thereby causing erratic action.
- 2. Do not restrict a valve's exhaust port as this can adversely affect its operation. Exhaust silencers must be resistant to clogging and must have flow capacities at least as great as the exhaust capacities of the valves. Contamination of the silencer can result in reduced flow and increased back pressure.

WARNINGS: Failure to follow these instructions can result in personal injury and/or property damage.

#### **SAFETY APPLICATIONS**

- 1. Mechanical Power Presses and other potentially hazardous machinery using a pneumatically controlled clutch and brake mechanism must use a press control double valve with a monitoring device. A double valve without a self-contained monitoring device should be used only in conjunction with a control system which assures monitoring of the valve. All double valve installations involving hazardous applications should incorporate a monitoring system which inhibits further operation of the valve and machine in the event of a failure within the valve mechanism.
- 2. Safe Exhaust (dump) valves without a self-contained monitoring device should be used only in conjunction with a control system which assures monitoring of the valve. All Safe Exhaust valve installations should incorporate a monitoring system which inhibits further operation of the valve and machine in the event of a failure within the valve mechanism.
- 3. Per specifications and regulations, the ROSS L-O-X® and L-O-X® with EEZ-ON®, N06 and N16 Series operation products are defined as energy isolation devices, NOT AS EMERGENCY STOP DEVICES.

#### WARNINGS:

Failure to follow these instructions can result in personal injury and/or property damage.

#### STANDARD WARRANTY

All products sold by the ROSS Group are warranted for a one-year period [with the exception of Filters, Regulators and Lubricators ("FRLs") which are warranted for a period of seven (7) years] from the date of purchase. All products are, during their respective warranty periods, warranted to be free of defects in material and workmanship. The ROSS Group's obligation under this warranty is limited to repair, replacement or refund of the purchase price paid for products which the ROSS Group has determined, in its sole discretion, are defective. All warranties become void if a product has been subject to misuse, misapplication, improper maintenance, modification or tampering. Products for which warranty protection is sought must be returned to the ROSS Group freight prepaid.

THE WARRANTY EXPRESSED ABOVE IS IN LIEU OF AND EXCLUSIVE OF ALL OTHER WARRANTIES AND THE ROSS GROUP EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES EITHER EXPRESSED OR IMPLIED WITH RESPECT TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE ROSS GROUP MAKES NO WARRANTY WITH RESPECT TO ITS PRODUCTS MEETING THE PROVISIONS OF ANY GOVERNMENTAL OCCUPATIONAL SAFETY AND/OR HEALTH LAWS OR REGULATIONS. IN NO EVENT IS THE ROSS GROUP LIABLE TO PURCHASER, USER, THEIR EMPLOYEES OR OTHERS FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES WHICH MAY RESULT FROM A BREACH OF THE WARRANTY DESCRIBED ABOVE OR THE USE OR MISUSE OF THE PRODUCTS. NO STATEMENT OF ANY REPRESENTATIVE OR EMPLOYEE OF THE ROSS GROUP MAY EXTEND THE LIABILITY OF THE ROSS GROUP AS SET FORTH HEREIN.

#### Full-Service Global Locations

There are ROSS Distributors Throughout the World

To meet your requirements across the globe, ROSS distributors are located throughout the world. Through ROSS or its distributors, guidance is available for the selection of ROSS products, both for those using fluid power components for the first time and those designing complex systems.

Other literature is available for engineering, maintenance, and service requirements.

If you need products or specifications not shown in this catalog, please visit ROSS' website, contact ROSS or your ROSS distributor. The ROSS Support Team will be happy to assist you in selecting the best product for your application.
